Take a look at the JWI difference:

FEATURES

- International Building Code (IBC) compliant wind and snow load design
- Maintenance-free materials
- Support design allows for unobstructed team viewing
- Support posts' size, spacing and height coordinated with fencing industry standards
- Easy field assembly of pre-fabricated components
- Adaptable to masonry and concrete wall systems

MATERIALS

- High-strength steel components
- Durable powder-coat finish (roof framing) available in many colors to match your team or facility
- Galvanized (support posts)
- Corrosion resistant fasteners

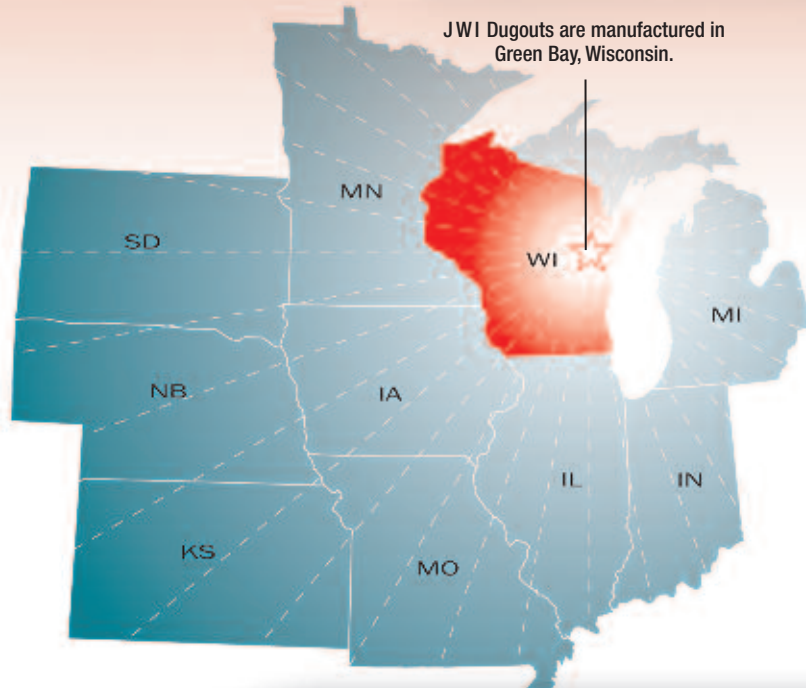

CONFIGURATIONS

- Model DG-10-20: 10 feet deep x 20 feet wide
- Model DG-10-30: 10 feet deep x 30 feet wide
- Model DG-10-40: 10 feet deep x 40 feet wide
- Custom sizes available
